👤 PROFILE

A highly motivated Web Programming and Development diploma student with a strong academic background in software development and a passion for Artificial Intelligence, Computer Vision, and Robotics. Hands-on experience developing integrated hardware-software solutions, deploying AI models, and building dynamic web applications. Seeking an entry-level position or internship in web development or software engineering to apply and expand my technical skillset in a dynamic environment.

🎓 EDUCATION

Diploma

Technical digital College

08/2024

Saudi Arabia, Riyadh

- **Associate Diploma in Web Programming & Development | Digital Technical College** *Graduation: Expected 2026*
- Core focus on comprehensive front-end and back-end web development frameworks.
- Developed strong competencies in software engineering principles, database design, and object-oriented programming.
- Actively engaged in practical labs, technical presentations, and collaborative team projects.

★ TRAINING & EDUCATION

Training & Experience

Digital Manufacturing Summer Bootcamp – Robotics Track

Organized by The Saudi Federation for Robotics & RC Sports, AI Arena

June 17, 2025 – July 6, 2025

- Completed a 3-week intensive robotics program.
- Gained hands-on experience with robotic systems, sensors, and automation tools.
- Collaborated in team-based projects focused on designing and programming simple robots.

AI Arena – Teaching Assistant (Intern)

Anisa Bint Uday Intermediate School, Riyadh

August 17, 2025 – August 21, 2025

- Assisted in delivering AI and robotics-related activities to middle school students for the WRO robotics competition.
- Supported the classroom environment and helped students understand basic AI concepts.
- Participated in organizing hands-on workshops in collaboration with AI Arena.

💻 TECHNICAL PROJECTS

Project 📌

SmartScan – Integrated Intelligent Image Analysis System *Developer & AI Integrator*

- Designed and developed an end-to-end intelligent image analysis system utilizing the **YOLO11m** computer vision model.
- Managed data engineering workflows, leveraging **Roboflow** for precise dataset labeling and **Kaggle** for efficient model training.
- Built a dynamic web interface connected to a back-end server via **PHP** and **SQL** to display real-time analysis results.
- Successfully integrated a hardware-based camera system (**Raspberry Pi Camera Module v2**) with a **Raspberry Pi 5** single-board computer, configuring local servers (Apache/XAMPP) for seamless live scanning.
- **Database & Web Management Applications** *Back-End Developer*
- Constructed and optimized complex database environments using **Oracle APEX** and standalone **SQL** architectures.

- Developed robust backend scripts to manage secure data queries, hidden data field logic, and dynamic application dashboards.

EXPERIENCE & BOOTCAMPS

AI & Robotics Teaching Assistant (Intern) | Al Arena / Anisa Bint Uday School *August 2025*

- Mentored and guided middle school students in robotics fundamentals and AI concepts to prepare them for the World Robot Olympiad (WRO).
- Co-facilitated hands-on technical workshops, fostering problem-solving skills and technical curiosity in young students.
- Maintained an engaging educational environment and simplified complex tech concepts for non-technical beginners.

Digital Manufacturing Summer Bootcamp (Robotics Track) | Saudi Federation for Robotics & RC Sports *June 2025 – July 2025*

- Completed a 3-week intensive technical program focused on advanced automation and digital manufacturing.
- Gained practical experience with advanced sensors, robotic automation tools, and physical computing.
- Collaborated in cross-functional teams to design, prototype, and program functional robotic systems, culminating in a successful competitive presentation.

VOLUNTEER EXPERIENCE

Computer Activity Organizer | *Technical Digital College for Girls, Riyadh* *October 2025*

- Volunteered for 10 hours under the National Center for Non-Profit Sector, coordinating and organizing technical computer activities and workshops for students.

Hajj Service & Scout Camp Logistics Organizer | *Adhwaa Al-Khair Charity Association (in collaboration with Saudi Arabian Scouts Association)* *June 2025*

- Contributed 24 volunteer hours in crowd management, operational organization, and logistical support dedicated to **Hajj service** within official scouting camps.

HONORS & AWARDS

- **The Build Award (Universities & Colleges Category)** | *National VEX Robotics Competition February 2026*
- Awarded by the General Organization for Technical and Vocational Training for outstanding achievements and team performance within the national qualifiers for the World VEX Robotics Championship.

Honorary Certificate of Appreciation | *The Saudi Federation for Robotics & RC Sports 2026*

Recognized for distinguished participation and performance in the National VEX Robotics Championship hosted at Princess Nourah bint Abdulrahman University.

- **3rd Place - University Category (Speed Challenge Track)** | *RoboRAVE International Robotics Competition (Saudi Arabia Finals)* *May 2026*
- Achieved 3rd place nationwide with team "Digital Stars", competing against university-level teams in the automated speed challenge track.
- Supported and recognized by the Technical Digital College for Girls in Riyadh, Ai Arena, TVTC, and the Saudi Federation for Robotics & RC Sports (SAFR).
- **3rd Place - Fast Track Category (The Race Toward Precision)** | *National Summer Robotics Championship* *August 2025*
- Secured 3rd place with team "Digital Stars" in the intensive national championship held in collaboration with Umm Al-Qura University.
- Organized by the Saudi Federation for Robotics & RC Sports, focusing on high-precision robotic programming and speed alignment.
- **MS Smart Scan – Integrated Intelligent Image Analysis System** *Developer & AI Integrator*
- Designed and developed an end-to-end intelligent image analysis system utilizing the YOLO11m computer vision model.
- **Exhibited & Recognized:** Selected to showcase the innovative project at the *World Day for Safety and Health at Work Exhibition 2026*, receiving official recognition and a Certificate of Appreciation from the Riyadh Region Technical and Vocational Training

CERTIFICATES

My certifications 

SKILLS

Programming Languages

Python, Java, C++, PHP, JavaScript, HTML5, CSS3.

Web Development

HTML, CSS, JavaScript, PHP

Technical skills

- Microsoft Office & Google Workspace
- Robotics (Basics)
- Basic graphic design

Database Management

SQL, Database Design & Query Optimization.

Soft skills

- Technical Problem Solving & Debugging
- Workshop Facilitation
- Presentation & Public Speaking
- Team Collaboration
- Critical Thinking .

Web & AI Frameworks

- YOLO11, Computer Vision, Edge AI (Raspberry Pi Ecosystem), Front-end/Back-end Web Integration.
- **Developer Tools & Platforms:** GitHub, Kaggle, Roboflow, Oracle APEX, XAMPP/Apache.
